

I bought XM radio specifically to use in my place of business...I am a Massage Therapist and went to XM because I was burning up my CD players and now I can have the music I need to play while working and I am also listening to various stations between clients and at home...I am in total support of satellite radio as it provides me with the music I need and many, many other stations that I now listen to too...there is enough to go around as long as you aren't greedy...we all have different needs and there is always someone out there to meet them..PLEASE REJECT NAB'S PETITION 04-160....
